Professional Summary

Final-year Computer Science student at Warsaw University of Technology and current Associate Product Owner with experience in ITSM processes and enterprise SaaS tools like ServiceNow. Passionate about product strategy, process optimization, and driving user-centric solutions. Proven ability to collaborate cross-functionally, gather and analyze data, and translate complex requirements into actionable outcomes. Quick to adapt, curious by nature, and excited to contribute to innovative, fast-paced teams.

Experience

ServiceNow ITSM Application Associate Product Owner

Procter and Gamble (P&G)

July 2024 - Current

1. Improve ITSM Data Quality:

- Created and analyzed a dashboard to identify and resolve incidents failing data quality checks.
- Documented configuration rules for Incident and Problem Management fields.
- Collaborated with Process Owners to define and implement new data quality standards.
- Proposed data quality checks to strengthen the Change Management process.

2. Execution of ServiceNow Recommendation Framework Pilot:

- Collaborated with stakeholders to define the product value proposition, success metrics, and pilot baseline.
- Developed and executed a pilot plan with training materials, documentation, surveys, and cross-instance testing.
- Provided ML model feedback and led weekly support meetings during the pilot.
- Result: Achieved 87.5% CSAT, up to 88% recommendation accuracy, and reduced user time by 30–60+ minutes weekly.

3. Documentation of ITSM Application:

- Reviewed and updated existing ITSM application documentation to ensure accuracy and relevance.
- Published a user-friendly ITSM Application SharePoint page, centralizing key information for end users.
- Published monthly Modern ITSM newsletter, enhancing visibility of team achievements.

Information Technology Summer Intern

Procter and Gamble (P&G)

July 2023 - Sept 2023

- Implemented Automated Test Framework (ATF) capability for Change Management process compliance testing in the ServiceNow ITSM application.
- Coordinated with key stakeholders to ensure alignment on test case implementation requirements and finalized design with ServiceNow Architect.
- Defined and managed the project timeline, ensuring timely delivery of milestones.
- Applied Scrum methodologies for sprint planning and execution using Azure DevOps.
