Profile

Detail-oriented Computer Science student with hands-on experience in backend development using Python (FastAPI) and API based automation in Java. Experienced in MongoDB NoSQL aggregation and SQL queries, with strong problem-solving skills. Eager to learn and contribute to scalable backend solutions in a collaborative environment.

Education

Warsaw University of Technology

Oct. 2021 – Present

BSc. in Computer Science

- Available for part-time and full-time opportunities (20+ hrs/week)
- Fluent in English - C1

Experience

Software Engineer in Test

Warsaw, PL

EY (GDS)

July 2024 - Present

- Performed API testing using RestAssured and Postman to validate service-level functionality and integrations.
- Developed an automated data verification system that reduced manual verification time by approximately 85%.
- Designed and enhanced Java 21 automation modules ensuring clean, reusable code, aligned with SOLID principles.
- Integrated automation framework with Azure DevOps CI/CD pipelines to validate services after deployment.

Functional Software Tester in Games

Warsaw, PL

Lionbridge Poland

July 2023 – Jan 2024

- Conducted comprehensive game testing, including Ad-hoc, Regression, Smoke, and Functional tests, to ensure gameplay stability and a seamless user experience.
- Identified, documented, and tracked defects using Azure DevOps, facilitating efficient bug resolution and improving game quality.
- Collaborated with developers and designers to reproduce and prioritize critical issues, ensuring timely fixes before release milestones.

Projects

Personal: RAG-based Profile Management System

[github: profile-llama](#) 

- Built a FastAPI-based backend system for parsing and analyzing profile documents using Retrieval-Augmented Generation (RAG).
- Implemented secure user authentication with JWT tokens and bcrypt, and managed user data using MongoDB.
- Developed document-processing workflows integrating PyPDF-Loader, OpenCV, and Tesseract OCR for text extraction.
- Tools Used: *Python, FastAPI, MongoDB, REST API, LangChain, OpenCV, JWT Authentication*

Professional: Tax, Information and Project Management Tool

- Maintained and enhanced an existing Java 21 automation framework using Serenity BDD, Selenium, and Cucumber.
- Implemented new Java-based modules following SOLID and design pattern principles (Factory, Builder,

Strategy, Facade, Singleton).

- Collaborated in an Agile SCRUM environment, contributing to sprint planning, feature implementation, and reviews.
- Integrated Git version control and Azure DevOps pipelines for continuous testing and deployment.
- Tools & Skills: Maven, Java 21, Selenium, RestAssured, Postman, Git, Azure DevOps, Design Patterns, SOLID Principles.

Professional: Java 21 based Data-Verification Framework

- Developed and documented an automation framework in Java to perform data verification between data sources and databases.
- Created and maintained test data and results in Excel for traceability and reporting.
- Actively participated in Scrum rituals and tracked progress using Kanban boards in Azure DevOps.
- Tools: Java, JDBC, TestNG, SQL (Basic)

Basics of Java OOP

[github: Java](#) 

- Developed a *Guess the Number* Game that generates a random number for User to guess.
- Built a *Rock, Paper, Scissors!* game to strengthen the knowledge of Object Oriented Principle.
- Tools Used: Java

Technologies

Languages: Python, Java (21), SQL, NoSQL

Backend & Tools: FastAPI, REST API, MongoDB, Git, Azure DevOps (CI/CD), Postman, LangChain

Other: Selenium WebDriver, TestNG, JUnit5, IntelliJ, PyCharm, VS Code, Jira, Confluence
